

For years, **SGM** has been a key international player in the field of entertainment lighting design and manufacture.

This success is based on a great business vocation, an on-going search for innovation and the passion of its staff.

The strong points of SGM's corporate philosophy are:

- Its **constant search** for product quality, via direct management of a manufacturing process that uses the latest generation of machinery and control systems.
- Its close attention to the needs of lighting professionals and trade members, thanks its work alongside them "in the field", which enables to study concrete **top-level solutions**.
- Its **Research & Development Centre**, in which each and every product is created with a skilful combination of passion for innovation and in-depth knowledge of the market's most demanding requirements.

SGM's vocation is therefore constantly confirmed with the launch of **products with unique features, studied in the smallest detail to ensure perfect solutions** for top events in live music, theatre, television studios and architectural installations.

In **SPOT** configuration, the **GIOTTO 1500** is perfect for those looking for a fixture with top-class expressive potential, featuring practically endless effects and an extremely powerful light beam. Thanks to its **exclusive assembly format**, the unit is easily built, fitting the “**CMY**”, “**Gobo**” and “**Zoom Focus**” modules one after another. The first module contains the CMY colour mixing system, linear CTO filter and Dimmer. “Gobo” hosts the optic functions necessary for creating a vast range of light effects: a colour wheel (5 colours plus white), two gobo wheels (each with 6 gobos plus white) and a space for the interchangeable animation wheel. As well as motorized focus and zoom, the “Zoom Focus” module also has an additional lens with three interchangeable functions: a second non-rotary overlapping prism, Zoom range extension and Wash function.

Automatic energy saving in the event of blackout use

In **WASH** configuration, the **GIOTTO 1500** features two modules: "**CMY**" (CMY colour mixing system, linear CTO filter and Dimmer) and the dedicated "**Wash**" module, with all the features that enable the fixture to emit diffused, soft even light. The various functions include a twin-blade built-in beam shaper, which sculpts the light projected on to specific zones of the set or scene, a field diaphragm and the possibility of adjusting the soft edge of the beam shaper and the field diaphragm. The Zoom lenses enable to adjust beam aperture from 6° to 40°, whereas the Frost lens makes it perfectly even. Three dedicated lenses are available for the fixture in Wash configuration: The **Fresnel Lens** enables to obtain a beam for even colouring, the **Anti-halo PC Lens** gives a very narrow intense beam with a limited soft edge field and the **Super Wide Lens** gives a very wide even beam aperture.

Thanks to the innovative internal layout, a **Giotto 1500 Profile** can be obtained by just fitting a **"Profile"** module between the first **"CMY"** module and the **"Zoom Focus"** module inside the fixture: this results in a high powered fixture with a vast range of effects that can be combined with the beam shaping feature typical of this type of unit. The **"Profile"** module has a colour wheel (5 colours plus white) and a gobo wheel (6 gobos plus white), as well as a four-blade beam shaper that enables to sculpt the light beam into various well-defined geometric shapes. These functions give their best when used with those of the **"CMY"** module (CMY colour mixing system, linear CTO filter and Dimmer) and **"Zoom Focus"** (motorized focus and zoom, plus additional lens with three interchangeable functions: second non-rotary overlapping prism, Zoom range extension and Wash function).

SYNTHESIS SPOT 700 is the first of a new generation of moving head fixtures designed and manufactured by SGM for leading edge professional applications. Wireless DMX interface fitted as standard and protection against incorrect power supplies of up to 400 Volts are only two of the unique features that show these fixtures have been studied and built without cutting any corners. It has a heart beating at 700 Watts that unleashes power comparable to a 1200W light source, with the possibility of fitting two types of lamps for two different colour temperatures: 7200°K or 5600°K. Automatic hot re-strike, colour mixing, an unbeatably precise linear dimmer, animation wheel, automatic electronic pan/tilt unlocking and silent operation as is the tradition with SGM fixtures, and as bright as required by SGM standards. **SYNTHESIS SPOT 700** is a combination of the best functions an automated fixture can offer.

CONSUMPTION

- Max consumption: 1,000 W
- Automatic energy saving in the event of blackout use

Powerful and feature-packed, **SYNTHESIS WASH 700** completes the SGM 700 series of fixtures. **SYNTHESIS WASH 700** has the possibility of fitting two 2 types of lamp with different colour temperatures: 7200°K or 5600°K. The cutting edge CMY colour mixing system and linear CTO filter enable absolutely any shade of colour to be obtained. A further 4-slot plus white colour wheel gives the possibility of generating all the deepest colours. The built-in 2-blade beam shaper is adjustable, with continuous indexing from 0 to 180°, enabling to sculpt the light beam to meet specific needs and ensuring high-precision lighting of specific areas of the set. Adjustable (6° to 40°) zoom, automatic hot restrike, colour mixing, unbeatably precise linear dimming, automatic electronic pan/tilt unlocking and silent running complete the **SYNTHESIS WASH 700**.

The latest evolution in the **GIOTTO 400** line of fixtures. The advanced series of effects and features puts it at the top of the class of moving head fixtures fitted with a 400W lamp. Compared with traditional features, **GIOTTO SPOT 400 CMY** has cyan, magenta and yellow colour mixing, to ensure an unlimited number of colours and different shades, Linear CTO, 2 wheels with rotating interchangeable gobos (each with 8 slots plus white) a 6-colours plus white colour wheel and an easily changeable animation wheel to create any kind of animated effects.

For years, its use in professional stage lighting applications has candidated it as the leading moving head fixture in its class, as far as performance and inimitable light quality are concerned. Used in the most important productions at world level, today it is still the favourite hot-strike 400W fixture, thanks to its luminous output (12,000 Lux at 5 metres), reliability and silent running. **GIOTTO SPOT 400** features motorized zoom (from 9° to 24°), electronic focus, CTO filters, half CTO UV, linear iris and frost, 2 rotating prisms, a wheel fitted with 8 rotating gobos, 8 colour filters and an effect wheel.

The **GIOTTO 400** serie wouldn't have been complete without a Wash fixture, a must whenever delicate uniform lighting is required. The advanced CYM colour mixing system, along with a linear CTO filter, enables absolutely any shade of colour to be obtained. A further 7-slot plus white colour wheel also gives the possibility of generating all the deepest colours.

GIOTTO WASH 400 features a built-in electronic beam shaper with two blades that can be moved from 0 to 180°, makes it ideal for theatrical applications and for high-precision lighting of specific areas of the set.

 - Automatic energy saving in the event of blackout use

GIOTTO 400 PROFILE was designed and manufactured specifically for top-level professional applications in theatre and television field, where it is necessary to be able to shape light beams freely and precisely, with bright well-defined edges. **GIOTTO 400 PROFILE**'s built-in beam shaping module is fitted with 4 blades, each of which can be independently controlled as far as insertion and inclination are concerned. In fact, each blade can be gradually inserted into the light beam until it is completely blacked out. The +/- 45° rotation of each blade on its axis enables to form any 4-sided or triangular shape extremely easily.

ACCESSORIES

DIMENSIONS (HxWxD) LIGHT DOME BOX	100 x 80 x 80 cm 140 x 90 x 90 cm
WEIGHT	70 Kg
CODE	020_2406
FAST-LOCK CODE	G000035

- LIGHT DOME**
- Cover for outdoor use with Giotto Spot 400, Wash 400 and Profile 400 fixtures.
 - The Dome is in highly transparent heat-resistant polycarbonate with a built-in ventilation system and grey ABS body.
 - Tamper-proof system.
 - Power requirements 220V AC, 50/60Hz, 30W.

- FAST-LOCK**
- “Fast-Lock” clamps, supplied as standard with all GIOTTO and SYNTHESIS fixtures, are manufactured in aluminium and designed to ensure secure mounting on truss and grids made from tubes with a diameter of between 38 and 50 mm.
 - On the bottom of the GIOTTO and SYNTHESIS fixtures, there are 8 slots for fitting the clamps, which can be mounted horizontally, Vertically or at an angle of 45° to the fixture’s base.

FLIGHT CASES

- FLIGHT CASE**
GIOTTO 400
- These sturdy flight cases were specially studied and designed for transporting and storing Giotto Spot 400, Spot 400 CMY, Wash 400 and Profile 400 fixtures, ensuring total protection against impact.
 - The flight cases are available in a double version (with castors fitted as standard) and a single version (castors on request) and are equipped with internal accessory compartments.

- FLIGHT CASE**
SYNTHESIS 700
- These sturdy flight cases were specially studied and designed for transporting and storing Synthesis fixtures, ensuring total protection against impact.
 - The flight cases are available in a double version (with castors fitted as standard) and a single version (castors on request), and are equipped with internal accessory compartments.

- FLIGHT CASE**
IDEA
- These sturdy flight cases were specially studied and designed for transporting and storing Idea Spot/Wash 575 and Idea Spot/Wash 250, ensuring total protection against impact.
 - The flight cases are available in a double version (with castors fitted as standard) and are equipped with internal accessory compartments.

REGIA 2048 OPERA is a professional lighting control console with hardware designed for all **theatrical and television applications**. With its large number of presets (96), it allows immediate manual access to a wide selection of channels for immediate control of typically conventional fixtures. And that's not all. It offers users all the typical features of the Regia 2048 series for advanced control of automated fixtures, with access to no less than 24 Playback Registers per page, expandable up to 36. **REGIA 2048 OPERA** also comes with **WYSIWYG CE** in bundle for all pro operators and LDs who intend making use of an avant-garde tool for show design and virtual pre-cueing.

REGIA 2048 PRO is the series' most compact lightweight lighting console for professional use. Suited to **permanent installations** or for backup use on large events, it has all the features necessary for flexible immediate control of large show lighting rigs. 24 Playback Registers expandable up to 36, as well as all the series' classical functions, make **REGIA 2048 PRO** a powerful effective controller that is also easy to transport and use. Pro has **WYSIWYG** in bundle for all those who intend making use of an avant-garde tool for show design and virtual pre-cueing.

PANEL

- _ 2 presets + memory registers on three 3 independent rows of 24 faders
- _ 24 programmable light chases (max 24 steps)
- _ 24 pages of memory registers

FEATURES

- _ Chases easily stored in memories.
- _ Independent adjustment of crossfade time between presets.
- _ Possibility of storing data and memories on PC
- _ 576 scene memories

OUTPUT

- _ 24 channels and double preset, or 48 channels single preset

CONNECTIONS

- _ DMX in/out connector, SMPTE socket for sync of memory register change
- _ Audio input and built-in microphone for music sync functions
- _ MIDI in/thru/out sockets
- _ Jack for up/down pedal control of memory register changes.
- _ XLR socket for service light (12V 3W)
- _ Universal AL4 switching power supply included

STUDIO 24 is a reliable user-friendly lighting control desk, able to control 24 or 48 channels of dimmable fixtures. The controls of the **STUDIO 24** include:

Manual Presets, 2 rows of 24 faders, which can be used as two 24-channel presets or a single 48-channel preset;

Registers, 1 row of 24 faders which control the memory registers;

Light Chase controls, for programming and controlling chases.

STUDIO 24 is an extremely versatile lighting control desk, ideal for a vast range of applications: from concerts to theatres, from clubs to television studios, from small to large show events.

CONTROL PANEL

- _ 40 programs to control intelligent units with 40 steps each
- _ 40 chase for a sequential control of dimmers with 40 steps each
- _ 40 psycho to control dimmers music intensity
- _ 40 preset (light scenes)

FEATURES

- _ Universal DMX controller for 40 units with a maximum of 36 channels each
- _ Constant monitoring of output parameters, thanks to the large rear-lit display
- _ Using the scroll function, operators can control blocks of 6 channels at a time
- _ Thanks to the (editable) on-board libraries, it is possible to assign functions to the faders at will: physical and soft channels are independent

- _ The section dedicated to automated fixtures (scanners or moving head units) has a dual coordinate system: absolute and relative
- _ Pilot 2000 is a standard 19" rack-mounting unit (5 units), but can also be used as a table-top console, thanks to the shape of its chassis.
- _ Possibility of storing data and memories on PC

OUTPUT

- _ 512 DMX channels to control, 192 channels for dimmers and 40 channels for intelligent units

HARDWARE

- _ 6 sliders for free programming
- _ 19 buttons for direct access to playback and programming functions
- _ 20 buttons for direct access to playback registers

MONITOR

- _ Gran Master slider + DBO button
- _ Joystick to control PAN and TILT with locks and fine buttons
- _ Built in microphone

CONNECTIONS

- FLASHER DMX 1.5
- _ Flash rate from 0 to 50 flashes per second (continuous light)
 - _ Dimmer adjustable from 0 to 100%
 - _ Single flash at maximum power
 - _ The universal power supply and automatic power factor correction system enable the unit to be used anywhere, and the DMX control (which only uses 2 channels) allow it to be run by any controller

- _ Its on-board computer constantly monitors fixture status and warns of any faulty operation
- _ Flasher is remarkably powerful: approximately 3 times that of a fixture of the same class

- SMART CONTROL
- _ 2 DMX channels
 - _ Automatic or manual operation
 - _ 2 faders (level)
 - _ 2 potentiometers (interval, duration)
 - _ 2 buttons (Out On/Off, Auto/manual)

FLASHER DMX 1.5 is a professional strobe light fitted with a 1,500W xenon lamp with an exceptional luminous output. Fitted in a sturdy metal case with an epoxy powder finish, **FLASHER DMX 1.5** is built according to CE norms and submitted to very strict tests that ensure its reliability even in the most extreme conditions. The optional DMX remote controller **Smart Control** enables a series of functions to be controlled.

VARISMOKE II DMX

- Very high-powered smoke machine
- Electronic output control with luminous monitoring of the main functions
- DMX 512 input signal.
- Power requirements 220V AC, 50/60Hz (10A).

SMART CONTROL

- 2 DMX channels
- Automatic or manual operation
- 2 faders (level)
- 2 potentiometers (interval, duration)
- 2 buttons (Out On/Off, Auto/manual)

VARISMOKE II DMX is a high-power smoke machine, ideal for creating suggestive atmospheres and for giving projected light more “body” and visibility. **VARISMOKE II DMX** is built with highly resistant materials that ensure great reliability, even in the most demanding applications, as well as very low maintenance. The optional DMX remote controller **Smart Control** enables a series of functions to be controlled.

_ PALCO 3

For cutting edge effects when sculpting light beams and whenever lighting is a key component in set design, SGM puts a wide range of GOBO and ANIMATION WHEELS at users' disposal.

GOBOS and ANIMATION WHEELS are the most practical modern means for shaping light beams and creating images with light. They offer Lighting Designers a wonderful tool with which to highlight their creativity when programming exclusive sets, looks and installations with remarkable visual impact.

GOBO

- _ Gobo systems provide an extraordinary range of graphic effects which can be even further enlarged by mixing and superimposing two gobos simultaneously.
- _ Almost any image can be reproduced on gobos nowadays, from simple geometric line art to colour designs and High Definition images.
- _ SGM's wide library of images includes three different types of gobo:
METAL, DICHHRO AND GLASS GOBO.

ANIMATION WHEELS

- _ Animation wheels, made in special steel, let you shape the light beam projecting a series of eye-catching patterns (flames, clouds, bubbles, and other shapes).

- _ For further information please refer to SGM catalogue High quality Gobos and Animation Wheels.

- _ Internal microcomputer
with large function menu
- _ Software updatable
via DMX

INSULATION DEGREE

- _ IP33

PALCO 3 MOBILE includes all the features of PALCO: silent operation, efficient consumption, high colour rendering, exclusive design and extremely compact lines - plus the possibility of being positioned as required, thanks to its pan and tilt movement. **PALCO 3 MOBILE** is fitted with absolute encoders, so when reset doesn't run any repositioning procedure: it goes immediately to the required position. If accidentally moved, it restores the position and when switched off, a special mechanism enables to block the motor in the current position. Silent operation is guaranteed. **PALCO 3 MOBILE's** qualities make it the right choice for replacing halogen colourchangers with pan and tilt movement in all television and theatre applications.

INSULATION DEGREE

- _ IP55

PALCO 5 has been fitted with a new very powerful LED model (the k 2), thanks to which, compared to the other SGM LED LINE models, it is able to ensure remarkable luminosity with decidedly limited energy consumption. PALCO 5 is, therefore, an extremely specific fixture, when it's necessary to illuminate large walls or cover longer distances. In matters of optics, it offers the same choice of interchangeable lenses as PALCO 3, which easily adapt to the various types of surfaces or objects to illuminate. Its high power, silent operation and protection to IP55 make PALCO 5 the ideal fixtures for lighting interiors (museums, art galleries, libraries, television studios, etc.) and above all for outdoor applications (architectural lighting in urban locations, monuments, buildings, etc.).

RIBALTA, a technically avant-garde colour-changing projector which, thanks to its 90 Luxeon LEDs, enables to colour large areas, such as walls, theatre and television backdrops, and architectural elements in general with its light beams.

Thanks to its particular shape and special asymmetric lenses, it can be rapidly and easily installed alongside the areas to be illuminated.

The interchangeable lenses are: asymmetric 8°; asymmetric 30°; elliptical 10° x 90°. Top colour efficiency: the red's intensity for example is the same as that of a 750W halogen lamp, but consumes less than 100W. A decidedly competitive relationship between low consumption and high colour rendering.

Being protected to IP65 makes it suited to both indoor and outdoor use.

GENIO is an extremely reliable high-tech colour-changing fixture able to ensure even, perfectly controllable wash lighting, generated by 16 high-power Luxeon LEDs. Thanks to its compact low-impact dimensions, **GENIO** is excellent for dynamic interior lighting for commercial applications such shops, hotels, bars and restaurants, as well as art galleries and meeting rooms. Its protection to IP65 also enables it to be used for outdoor architectural illumination, such as urban sites, monuments, fountains and cruise liners. **GENIO** can be remote controlled via a dedicated IR control unit.

GENIO MOBILE is a compact, stylish colour-changing projector that uses new LED technology. 16 high-power Luxenon LEDs enable it to generate a diffused even light beam, combined with silent movement, as is the tradition with SGM. **GENIO MOBILE** is totally silent; the fixture is convection-cooled by means of its rear finning, and an electronic self-regulating internal temperature system ensures continuous operation. GENIO was designed and built for the countless situations in which design, agility and compact dimensions are required. Applications range: from sales outlets to art galleries and from television studios to theatres. **GENIO MOBILE** is suited to indoor and outdoor installation, as it's protected to IP65.
